## About

My name is Anthony Fu, a master of computer science student and a freelance software engineer. My passion for software lies with dreaming up ideas and making them come true with elegant interfaces. I take great care in the experience, architecture, and code quality of the things I build.

I am also an open-source enthusiast and maintainer. I love how collaboration and knowledge sharing happens through open-source and I am happy to see what I do could eventually feedback to the community and industry.

Outside of programming, I enjoy doing photography and traveling. I treasure the feeling when capturing wonderful moments and sharing them with people.
